Which we will sell at your own terms as we require the shop room for overhauling work and winter storage.

Come in at once if you are contemplating buying a car, for we can save you a lot of money, if you buy this month.

Peterson Motor Co., Ltd.

Oyen District Victory Loan Campaign

It is very gratifying to hear that the Oyen canvassers are receiving a welcome at every home where they have called, and almost every one canvassed has bought Bonds. This is very encouraging to the collectors, for we all realize that this year the crops were not very good in this district, but at the same time everybody realizes the importance of the Victory Loan and know that we must do our part in a satisfactory and successful way, and by buying a Victory Bond this purpose can be accomplished. Canada's war expenditures today is greater than before. There are 75,000 more Canadians overseas than there were a year ago. Even if peace came to-morrow it would probably take from 12 to 18 months to bring all the Canadians back. They would have to be kept in the meantime. Don't let the German peace propaganda interfere with this cause of the Victory Loan. It is as much your duty to save as it is the duty of the soldier to fight.

When the canvasser calls at your home have your mind already made up to how much you will invest in Victory Loans. Give him the glad hand of welcome. Remember he is giving his time for the benefit of the country, and in order to make his work a success he needs your encouragement and support. Subscribe to it today.

Death of Pte. Jim Smith

Pte. Jim Smith, who enlisted some time ago and left for overseas this summer, is reported as having died in England from influenza. Previous to enlistment Pte. Smith was working in the Seal district. His parents reside in Alask.

OYEN CHAUTAUQUA POSTPONED.

Directors Decide on Putting Off The Festival on Account Of Flu Epidemic.

The Oyen Chautauqua committee met last week and decided that owing to the serious situation which has been brought about by the Spanish influenza, the holding of the Chautauqua in Oyen will be postponed for the present. As soon as conditions will permit, arrangements will be made by the local committee to make another date with the Chautauqua people to come to Oyen.

Influenza Situation in Oyen Improves

The influenza situation in Oyen is improving and from all accounts the epidemic in town is on the wane. Only about six cases have been reported during the week and all are progressing very favorably.

A Number of Flu Cases in the Country
 It has been stated that there is quite a number of people in the country suffering from influenza, and that both north and south of town there are families down with sickness.

Everybody buy Victory Bonds—This means you.

Locals And Personals

Do your Christmas shopping early—buy a Victory Bond.

We are pleased to notice several of our townfolk are out on the streets again after their attack of influenza.

Wm. Morrell left on Saturday morning for Strassburg, Sask., to attend to his farming interests there.

Mr. and Mrs. McAllister, who have been looking after their farming interests at Govan, Sask., returned to town last Thursday.

Sergt. W. D. Morrell, who has been home on harvest leave for the last eight weeks, returned to Calgary last Sunday morning.

The war is not yet over—Buy Victory Bonds.

It is very gratifying to notice that the Oyen fire hall is nearing completion.

Constable Torpey, who has ill with influenza is progressing very favorably and is now convalescent. Constable J. J. Miller of Calgary is stationed here during Mr. Torpey's absence.

Mr. W. Matthews, General Manager of the Bank of Hamilton, Calgary, was in town this week making arrangements to reopen the bank here.

Mr. John Naismith, who has been looking after his own business here while he was ill, returned to his home in Yreka last Friday morning.

Friends of Dr. and Mrs. J. J. Kelly will be pleased to learn that they are progressing very favorably from their attack of influenza.

Bar Barbarism by Buying Victory Bonds!

Stan. Cunningham and Wm. Hilde of Sibbald were visitors in Oyen on Monday last.

Mr. B. E. Kelly was a visitor in Calgary over the weekend.

Now is the time to send a Christmas gift overseas. We would suggest Wrist watch, Cigarette Case or a Gillette Safety Razor.—J. W. Crockett, Jeweler and Optician.

The three sure things in life—Death, Taxes and Victory Bonds.

J. W. Snell, a well-known farmer in this district, is retiring from the farm and intends holding an auction sale of the whole of farm stock in the near future. Watch for further particulars.

C. E. Beard purchased thirty head of Polled Angus heifers and cows last week from R. C. Hallman of Acadia Valley.

The attention of our readers is directed to an announcement in our advertising columns to soldiers on harvest leave.

Mr. T. Brownlee, the C. N. R. Company's special agent, was in town on Monday.

The Oyen district experienced its first snap of winter on Tuesday morning when the first fall of snow came.

John Oweat who has been going under an operation in Calgary, returned on Sunday.

CARD OF THANKS.

Mr. and Mrs. J. Horne, of Oyen, desire to thank the many friends who rendered their sympathy and assistance during their recent sad bereavement.

Giving Help To Canada

The Victory Bond, good investment though it is, is a great deal more than that. It is the documentary proof that its possessor has an active and living impulse to aid Canada in carrying the burdens that have been imposed on her by the war, and the further burdens that will ensue in the great constructive work that will follow Peace.

War Efficiency and National Prosperity

More than a billion and a half dollars distributed in Canada for exported agricultural produce and the products of labor in the fiscal year ending March 31, 1918, has kept Canada busy and prosperous in spite of the war.

CANADA'S production in such enormous quantities was made possible only by the money received through Canada's War Loans. Canada thus was enabled to assist the Allies in their purchases here by establishing financial credits for their use in this country.

CANADA'S war loans not only have sustained Canada's war effort, but they have kept the wheels of production turning as they never turned before.

This is the flood of cash which pours into Canada's farms for their export in the fiscal year 1918, for:

Butter	\$ 2,000,000
Cheese	5,602,000
Eggs	2,271,000
Cats	37,644,000
Wheat	\$6,341,000
Flour	95,896,000
Meats	76,729,000
Vegetables	19,034,000

Over six hundred and thirty-six million dollars for exported farm products alone!

AND the workers of Canada also shared greatly in Canada's export trade.

For their products there was distributed in Canada, during the year:	
Munitions	\$50,000,000
Metals	92,083,000
Vehicles	22,776,000
Wood Pulp and Paper	59,599,000

These huge sums were spent in Canada by the Allies.

Canada's own war expenditure for the fiscal year 1918 was \$342,762,000.

And the bulk of all these expenditures, the foundation of Canada's prosperity and war effectiveness, was made possible only because the subscribers to Canada's war loans furnished the working capital.

CANADA must keep this great work going—must produce as never before; must work, fight, and lend as she has never yet done to bring victory and a lasting peace to a war-ridden world.

But Canada to-day (thanks to her great export trade) is in a better position now than ever, to carry on.

The Victory Loan 1918 will keep Canada busy, will enable her to maintain her great export business; and it will make Canada more efficient than ever, because her prosperity will not be diminished and her determination to work, fight and win will be stronger than it has ever been before.

Get Ready Now to Buy Victory Bonds

Issued by Canada's Victory Loan Committee in Co-operation with the Minister of Finance of the Dominion of Canada

ABOUT INFLUENZA

The following is an extract of a letter written by Dr. R. C. Galt to the Edmonton Journal:—
"The following information regarding epidemic influenza is revealing. It is the opinion of the majority of American clinicians at the present time, may be of considerable help to the people of this district. The following is the opinion of a 'veteran' of the successful physician of the West, who has the personal experience of passing through the great flu epidemic of Russia. Influenza in 1918-19. It is apparent that the influenza of this earlier period is identical to our present pandemic of Spanish influenza. The physician referred to is an author of medical texts, and the effects of this in procuring and curing disease. Dr. J. H. T. M.D., of Denver, Colo., was for five years one of the foremost physicians of Denver, and the state of Colorado, coming there from the flu of 1918, which he had been in practice with his father, who likewise was a physician. He is at present about 70 years of age, hale and hearty, has escaped charges of two transformations in the above city, besides editing a health magazine, and writing continuously on medical subjects. In his book entitled 'Impaired Health, Its Cause

and Cure,' Volume 2, he says, regarding influenza:—
"It is a pandemic disease, coming in irregular intervals, traveling rapidly, and extending over a vast territory in a short time. There are pandemic and sporadic outbreaks every year in some part of the country, usually of a less severe type. The difference between influenza and the ordinary cold is the tendency of the former to continue long after the time for a hard cold has disappeared. In the case of influenza the disease is more extensive, there is a constitutional disturbance. Some patients complain of being very weak, and in some cases the weakness runs on for weeks. The attack, which is always pronounced, hangs on continuously. One day the patient feels as though he was almost well, and the next day he knows that he is not well. He feels that he is going backward rather than forward. My individual experience has led me to believe that the different forms of catarrhal fever, cold, influenza, etc., are one and the same, only differing in degree, and that the difference depends entirely upon the condition of the patient. Those who have much constipation or decomposition in the large intestine, with toxin absorption

into the bloodstream, and who have had eating habits and are neglecting the care of the body, relative to over-eating, not exercising, or sleeping in poorly ventilated sleeping quarters. These are the cases that develop the severest forms. The seasonal is always a victim to a severe form. All those who are over-eaten have difficulty in throwing off the disease."
Regarding treatment, from experience in his handling this disease, Dr. Tilden says:—
"As soon as the disease starts, the patient should stop eating, and take a hot bath, provided by a copious enema of two quarts of warm water and a tablespoonful of salt. After the bowels move forward from the injection of water, the bath should be taken, and continued until all pain and discomfort are gone. The bathing should be kept up daily. In very severe cases, where there are great nervousness, headache, and pain in the body, all the discomfort should be removed by the hot bath, even if the bath has to be taken every three hours. The water should be as hot as the patient can stand comfortably, as the patient can stand comfortably. After the patient has been in the bath

for five minutes, the water should be heated to as warm a temperature as the patient can stand. Just how long the bath should be continued depends upon how quickly the patient gets relief. When relaxation and comfort come the bath should be stopped. The hot water should be allowed to run out of the tub, and cold water turned on, as the patient should have the bath cooled down as much as will be comfortable as he leaves the tub, care being taken to prevent chilling in returning to bed. If the bath becomes too chilly in adding the cool water the patient should leave the tub and return to bed at once. If there is a tendency for cold hands and feet, hot applications, hot water bottles, etc., should be kept up. If there is a tendency for drugs are to be given in such cases. If this plan is carried out, there will be no complications, there will be no spasms, and the disease, even the worst forms of it, will terminate in one week. Such symptoms as delirium, rheumatism, peritonitis, etc., can be developed only in those patients who are fed and medicated. The enemas for the bowels should be used twice daily, during the acute period of five days or a week. Plenty of fresh water

A CHANCE FOR CANADIAN CONSUMERS

Consumers of Canada have now an opportunity of ascertaining just whether the prices they pay for foodstuffs are reasonable and fair or possible extortion by illegal profiteers. All they have to do is each municipality in Canada is to ask their municipal council to appoint a fair price committee to investigate the prices asked by retailers, and to draw conclusions as to whether these prices are high and reasonable. These fair price committees will then publish their findings in the form of a list.

In this way consumers will be able to make sure whether they are paying prices which are unreasonable and unfair or not. It may be that the prices which the committee considers to be fair and reasonable will not be any lower than the present prices charged by the retailers. In some cases they may be higher. But that need not bother the consumer so long as he is satisfied through the investigation of the municipal fair price committee within his own municipality that the prices published indicate a fair and reasonable standard to guide both consumer and retailer, having in mind war conditions and the unsettling of pre-war prices.

If there is a desire on the part of the consumer to find out just where they stand, and to see the prices which they have to pay for foodstuffs, they now have a golden opportunity to have the matter dealt with once and for all under the provisions of the recent order-in-council, authorized by the Department of Labor, relative to the appointment of fair price committees.

In some quarters it is said that fair price committees will not solve the food problem present in most households. It may be possible to suggest that municipal fair price committees first should be given a chance to show that they can find a solution before the principle of municipal fair price committees is confidently put out of hand. It is a good rule to support measures that seem to tend in the right direction. A similar program has been effected in the United States.

The virtue of this order-in-council, giving authority to municipalities to appoint fair price committees to investigate the prices consumers have to pay, lies in the publicity that will be given to the findings. In this way public opinion will be informed, and enlightened public opinion will be trusted to co-operate in all national food efforts if it knows the facts. You can always give anything a thorough trial once.

should be drunk by the patient, hot, slightly warm or cool, not cold.

In returning to food, orange juice, diluted grape juice, or slightly sweetened lemonade are the best to begin upon, followed by light meals of vegetable broth, one or two slices of thoroughly toasted white bread, soft cooked egg, glass of warm fresh milk.

In passing these details of the disease and its treatment it may be made available to the people in remote sections of the country, as well as those who think they are well enough to call a physician. However, it should be borne in mind that the health department of this province have acted with the greatest promptitude and energy in protecting us from the disease, and this should be appreciated by every citizen. It is to the extent of complying fully with all rules laid down for the limitation upon public gatherings, keeping all cases and urge your neighbors to do likewise; treat children and others under your care with care, keep your houses warm and well ventilated, by lowering the windows from the top and lifting at the bottom two or three inches, to let the ventilated air escape at the top, and the fresh air to enter at the bottom, or let the air enter through a slightly opened door or window on both sides of the room or on one side, depending upon the prevailing wind, protecting patients or inmates from cold drafts by placing beds out of the line of ventilation, or hanging up curtains, or bed-clothing for the same purpose.

lowering the windows from the top and lifting at the bottom two or three inches, to let the ventilated air escape at the top, and the fresh air to enter at the bottom, or let the air enter through a slightly opened door or window on both sides of the room or on one side, depending upon the prevailing wind, protecting patients or inmates from cold drafts by placing beds out of the line of ventilation, or hanging up curtains, or bed-clothing for the same purpose.

EPIDEMIC INFLUENZA

Instructions Regarding + Care of Sick Persons

Since thousands of people are nursing influenza patients in the province, the following instructions will be of value:

- 1.—Fresh air is the most essential requisite to the comfort and well-being of patients, no matter how ill.
- 2.—Rest in bed for three days after fever has gone is urged to prevent complications.
- 3.—Pneumonia cases should not be kept in the same room with uncomplicated influenza cases.
- 4.—Nourishing food at regular intervals.
- 5.—Plenty of water or lemonade.
- 6.—General Unworried Service: Avoid chattering, nagging or questioning; anticipate wants of sickest patients, convalescents usually ask for what they want; keep the patients in isolated rooms, in separate beds; keep patient in bed all the time (this means patient must not get up to go to the bathroom); two or three pillows arranged step fashion, the lowest well under the shoulders, will make breathing easier; keep the arms and shoulders well covered; ventilate the room freely; at the outset, headache and backache are frequent; cold cloths (moist but not dripping) to the head, changed frequently, give some relief; avoid anything that might cause the slightest chill.

CARE OF MOUTH—A mouth wash every few hours and cold cream to the lips help to keep the mouth in a normal condition.

If the patient is extremely weak, swab the teeth carefully with moistened cotton applications three times daily.

COUGH—Patients should keep mouth covered when coughing. Paper napkins or three thicknesses of toilet paper used only once, are safer and better than rags or handkerchiefs. Keep a small paper bag pinned to bedside within easy reach of patient's hand, to receive the used napkins. Change bag at least twice daily, or whenever half full.

The invisible spray from the mouth and nose during coughing and sneezing is as dangerous as visible expectoration. Convalescent patients can be masked; weak patients are annoyed by them.

FOOD—For the unhappy, feverish patients, liquid diet, hot or cold, as preferred—milk, lemonade, weak tea and coffee, broths. For the convalescent and patients not feverish, soft diet—gruels, cooked cereals, milk toast, jellies, soft boiled eggs, etc.

Food may be kept warm in a thermos bottle.

All patients should drink some water every hour when awake.

PRECAUTIONS—All mouth washes, bath water, excreta, and unclean liquid food should be thrown into the toilet by the attendant.
All bags, napkins, scraps of unclean food, mouth swab, etc., should be wrapped in clean newspaper before being carried to the kitchen to be destroyed by burning.

All linen—sheets, masks, towels, etc., should be submerged in a large kettle of cold water in the sick room, or put in a pillow-slip, or laundry bag. This can be safely carried to the kitchen stove, and when contents have been boiled five minutes anyone may finish caring for the linen. When attendant cannot stop to wash her own hands, door knobs, faucets, etc., should be protected by scraps of newspaper, which may be destroyed after each using. Attendants must be constantly masked, must wear big allover aprons in sick-room, changing it to a different one always before entering any other part of the house. Attendant must have facilities for washing her own hands, soap, nail brush and towels, in clean place, and never touch the patient or patient's utensils without afterwards cleansing her own hands thoroughly. Running water is better and safer than a basin of weak disinfectant kept for the hands alone.

Everything used for the patient should be kept separate from the supplies for the rest of the household. This means dishes, bed linen, bath wraps, towels, face cloths, rocking chair, ect.

Families can help visiting nurses and aids by having hot water, towels and newspapers ready when nurses are expected.

Secretary was instructed to advise all who were advanced seed grain that we had first lien against crop and must not be disposed of till lien is satisfied.

Union Bank of Canada was requested to grant credit of \$15,000 for balance account.

Councillor Ellis was instructed to remove store borrowed from J. C. Cottrell.

Council adjourned to meet on Wednesday, November 6, 1918.

RALPH GREENE,
Secretary-treasurer.

If it is your last dollar have your teeth cared for. Your health depends upon good teeth. Have them examined. Dr. Taylor, Alaska.

NEW ORDER ISSUED BY THE PROVINCIAL BOARD OF HEALTH.

The Provincial Board of Health, in view of the spread of the influenza epidemic, extended the order prohibiting all public meetings or gatherings of seven or more persons, including schools, churches, theaters, picture shows, auction sales, etc., to the whole province of Alberta. This order came into effect at 7 p.m. Thursday, October 31st.

The board also ordered the compulsory disinfection of the mouth pieces of public telephones throughout the province. The board took under advisement the question of stopping all work by threshing gangs, but decided to leave it to the discretion of local boards of health.

Concerning telephones, the order says that proprietors and owners of all public telephones shall equip and furnish all pay stations with antiseptic appliances by fixing a sponge to every transmitter or furnishing a supply of carbonized vaseline, in which case it shall be the duty of everyone using the instrument to use such sponge and wipe on the transmitter or mouthpiece; or the owner or operator shall at least twice daily disinfect the transmitter or mouthpiece with formalin of about the strength of one dram to eight ounces of water.

AN APPEAL TO CANADIANS.

Have you thought of those on whom the great burden of the war has fallen? Of their suffering and distress caused by the German murderers of the seas? Have you thought who they are?

They Are Dependents of the Merchant Sailors!

Fifteen thousand men of the Mercantile Marine have been killed, and thousands of men in the Navy. We owe our all to these men. Our shores have been kept from invasion; thirteen million soldiers and millions of tons of munitions have been carried across the seas without mishap; our food supplies have gone forward regularly, and Canada must do her fair share in looking after those who have lost husbands and fathers.

Oyen has been asked to contribute the sum of \$500.00 to assist in caring for the dependents of the men of the Mercantile Marine and Navy who have made the supreme sacrifice in this present war.

WILL YOU HELP?

Contributions may be handed to the following local gentlemen: B. E. Kelly, W. R. McEachan and The News Office.

ONE FIFTY DOLLAR VICTORY BOND WILL

Buy 1,400 rifle cartridges, or 100 hand grenades, or 100 rifle grenades, or 10 gas masks, or 50 pair of soldiers' socks, or 10 pair of soldiers' boots, or Knives, forks and spoons for a company, or Pay Canada's war bill for 4.13 seconds, or Oat soldier for 40 days, or Feed 100 soldiers for 40 days, or Buy 1,000 yards of adhesive tape.

MUNICIPAL DISTRICT OF CANNER NO. 301

RE SEED GRAIN

NOTICE is hereby given that arrangements are being made to supply seed grain for spring sowing, 1919. For the convenience of the ratepayers, application forms will later on be supplied to each councillor, who will return them to the Municipal Secretary after the applications are taken.

It is expected that seed will be furnished on both patented and unpatented lands. But it is suggested that the ground be in suitable condition to insure favorable consideration of said application.

WHEN YOU SUFFER FROM RHEUMATISM

Almost any man will tell you that Sloan's Liniment means relief

For practically every man has used it who has suffered from rheumatic aches, soreness of muscles, stiffness of joints, the results of weather exposure.

Women, too, by the hundreds of thousands, use it for relieving neuralgia, lame back, neuritis, headache. Clean, refreshing, soothing, economical, quickly effective. Say "Sloan's Liniment" to your druggist. Made in Canada. Get it today.

Sloan's Liniment
Kills Pain

Situation Grows Difficult

Thousands are Employed Repairing Zeppelins

Thousands of laborers are now engaged in repair work on the Zeppelins, according to a frontier correspondent of the Telegram. They are working under the direction of German military engineers on the Molt, the locks and the walls of the canal in an attempt to clear the canal of the cement-weighted drums which were sunk there by the British. The Telegram reports that all the repairs which have been directed out at Zeppelins harbor, Molt and locks have been destroyed by airmen, and the canal remains closed. Strains as the Germans will by slave-driving methods to re-construct Zeppelins as a practicable harbor for their submarines, the conditions in Zeppelins of the British army maintain the effect of the British navy's work.

Actually the situation grows continually more difficult for the Germans, because sand fills up against the sunken ships and makes it impossible in whatever remained of the fair-ways. Each day the heavy tides become more firmly imbedded.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother's Grain Worm Exterminator.

Congregating in Solitude

Here is an extract from a hotel prospectus in Switzerland:

"Wiesbach is known as the quiet place of resort for those who are fond of solitude. Persons in search of solitude are, in fact, constantly flocking here from the four quarters of the globe."

Use no more sugar than you need and stir your beverage until the sugar is entirely dissolved.

It is estimated that each one-third cup of tea and coffee. Think it over—how is it in your home? Is there a chance for saving?

"Now, Lieutenant Tompkins," said the general, you have the battalion in quarter column, facing south—now would you set it into line in the quickest possible way, facing north-east?"

"Yes, sir," said the lieutenant, after a moment's fruitless consideration, "do you know, that's what I've often wondered."

"That on and after the 1st day of February, 1918, no person shall deal in wholesale in fresh fruits or fresh vegetables, without first having obtained a license from the food controller, and in violation of such order, shall be liable to a fine of not less than \$1000."

"I think we have come to the time when each part of the empire will move to build up the empire. Some politicians are too stupid to see this unwisely already. I don't agree with you."

"No one longs for peace more than I, and I don't think it is the last war. The crimes which have been committed in Belgium prove that human nature has not made much progress in the last 5000 years, and as to make it improve, there can be no lasting peace. It is our duty to keep the British empire intact, and to keep it strong in its day of another war."

"We are partners now with the Mother Country. Each nation must stand side by side, and each must think for itself, but in imperial affairs each country must work for the empire."

"I don't think that I was sick, but only tired. However, the time came when I did not get up in the morning. I simply could not. The doctor came and said, 'Nervous Prostration.' It seems I had kept on the go until the nervous system was wrung dry of all nerve force."

"Then came the long, weary weeks, and

weeks dragged into months, without finding much improvement. I was completely discouraged and almost devoid of hope."

"But one day a friend told me of her experience with Dr. Chase's Nerve Food, and she was so sure that this treatment would do me good that I decided to give it a chance."

"I need scarcely say that there were some dark, discouraging days after beginning the use of the Nerve Food, but as my appetite and digestion improved, I felt that I was gradually getting back the old-time vigor. Sleep became more natural and refreshing. The dark days passed and I began to take a more cheerful view of the future. Then I began to plan what I would do when I got around again. The house must be decorated and the children brought home, for I had to send them to my sister's on account of the way their noise disturbed me."

"Now I feel that I am entirely well again, and without hesitation give the credit to Dr. Chase's Nerve Food. I cannot tell you the pleasure it gives me to be restored to my husband and children after the long period of helplessness."

Dr. Chase's Nerve Food, 50 cents a box, & for \$1.75, all dealers, or Edmondson, Baker & Co., Ltd., Toronto.

Fashionably Pointed Artificial Feet

Practice of Cutting Down of Foot to Fit Shoe

Some returned soldiers with leg amputations, who have been issued artificial feet by the department of soldiers' civil re-establishment, have undertaken to cut down the wooden foot to that it will fit into a fashionable pointed boot. The officials of the civil engineering and supplies branch of the Canadian department with to call the attention of the veterans to the fact that this practice is unwise. A man who has worn army boots for some time knows that this practice is unwise. A man who has worn army boots for some time knows that this practice is unwise.

It is especially true in the case of a man with a leg amputation, for during the months that he is waiting for his stump to heal sufficiently for the wearing of an artificial leg, his remaining good foot carried an additional burden no greater than it is often necessary to prepare special orthopedic boots for this foot. In any case the strain upon it is so much greater than usual that a narrow last is impractical. The department at Ottawa announces that it will not be responsible for adjustments in artificial limbs that have been altered in this way.

Faultless in Preparation.—"Unlike other stomach regulators, Parine's Vegetable Pills are the result of long study of vegetable compounds calculated to stimulate the stomach's functions and maintain them at the normal condition. They have been proved their faultless character and established their excellent reputation. And this reputation they have maintained for years and will continue to maintain, as these pills must always stand at the head of the list of standard preparations."

Insult to Injury
"What's up, Alf? Don't seem half in a rage."
"So 'd you be if you saw a little 'in' civilian fanning your best girl with his exemption card."—Vancouver Press.

Minard's Liniment Cures Disemper.

Save the waste
12,000,000 cups of tea, coffee, and cocoa are used daily in Canada. If even a average of half a teaspoonful of sugar per cup is left undissolved at the bottom of each of these beverages the waste would be 12,000 lbs. of sugar daily.

Use no more sugar than you need and stir your beverage until the sugar is entirely dissolved.

It is estimated that each one-third cup of tea and coffee. Think it over—how is it in your home? Is there a chance for saving?

"Now, Lieutenant Tompkins," said the general, you have the battalion in quarter column, facing south—now would you set it into line in the quickest possible way, facing north-east?"

Dealers Must Have License

Buying or Contracting for Produce Without License Contrary to Regulations

The attention of the Canada food board has been called to the practice frequently adopted by licensed dealers in apples, turnips, potatoes and other fruits and vegetables, of having men living in different parts of the country acting as their agents, buying or contracting such produce, and retarding the loading of same on cars ready for shipment, and receiving a commission from said dealer.

Such a practice is operating in the manner mentioned, without first having secured a license from the board, is done so contrary to the order dated 13th day of December, 1917.

"That on and after the 1st day of February, 1918, no person shall deal in wholesale in fresh fruits or fresh vegetables, without first having obtained a license from the food controller, and in violation of such order, shall be liable to a fine of not less than \$1000."

Must Keep On Going

Alles Must Pore Their Way Into Germany

Sounding a keynote of "no negotiation without occupation," James W. Gerard, former United States ambassador to Germany, declared there must be no thought of peace until troops of the entente have forced their way into Germany territory.

"There must be no negotiation without occupation," James W. Gerard, former United States ambassador to Germany, declared there must be no thought of peace until troops of the entente have forced their way into Germany territory.

Aeroplane Spruce

C. C. Supplies Best Wing Beams in the World

It is a long journey from British Columbia to the battlefields of Europe, from the stolid States to the centuries roared immovably in the ground, to the aeroplane, darling of the modern world.

But such is the journey and such the evolution of the great spruce that grows in the western States. Scientists have given it the name of Picea canadensis. It has five other names, the latest of which is aeroplane construction. For the wing beams of the aeroplane, straight sticks of timber from sixteen feet to thirty-five feet long are required, and this tree with so little taper, to make the grain run crosswise, supplies the very best wing beams in the world.

It is also very tough and very light and toughness and lightness are requisites in aeroplane timber. The foot of the wood weighs twenty-five pounds per cubic foot.

Only about twenty per cent. of this whole log is cut up, but the timber which remains is of a size of one hundred and twenty-five dollars, a considerable sum, although it is sold, as a year ago it sold for ordinary commercial purposes for about four dollars. Only about three per cent. of the log is cut up, but the timber which remains is of a size of one hundred and twenty-five dollars, a considerable sum, although it is sold, as a year ago it sold for ordinary commercial purposes for about four dollars.

Only about twenty per cent. of this whole log is cut up, but the timber which remains is of a size of one hundred and twenty-five dollars, a considerable sum, although it is sold, as a year ago it sold for ordinary commercial purposes for about four dollars.
